FUNDAMENTALS OF GD&T

Regal Metrology, Inc. is pairing with AGI to offer GD&T training at their Louisville, KY location as a cost-effective way to receive professional training. The AGI seminars feature knowledgeable instructors with real world experience. This program is designed for anyone who designs, drafts, engineers, purchases, manufactures, estimates, or inspects parts and assemblies. Your drawings have GD&T on them (or maybe they are supposed to)! If you have been attempting to work with GD&T, and you lack the confidence to specify or are having trouble interpreting the specifications, this course is for you. Using GD&T improperly can be worse than not using it at all! This program is a complete introduction to the Y14.5 standard. In this program, we will focus on the "what, when, why and how" of GD&T. The main goal is to bring all participants to a common, basic, and operational level of understanding. The course is a thorough introduction to those with a little to a moderate level of experience with GD&T, but you will not be an expert. Complete GD&T training requires more than just a few days.

This course is an introduction to the ASME Y14.5 standard

- Review of the "old" system versus GD&T
- Rules of dimensioning and drafting
- Tolerance Zones
- GD&T symbology and definitions of controls
